PROFESSIONAL EXPERIENCE

[Natwest Group\(RBS\)](#), *Frontend Team Lead*

Feb 2023 – Present

- **Developed and optimized** an internal **calculation rule engine** to standardize **credit charge** and **interest rate** calculations across multiple **banking brands**.
- Developed and maintained **micro frontend architecture** for multiple projects like Tariffs, Agreements, Customer Views, etc.
- Handling a global team of developers for managing, tracking, and successful delivery of Jira tickets at hand.
- Implemented **CI/CD pipelines**, and **GitHub templates**, and conducted **training sessions** for devs to enhance operational efficiency, which resulted in 20% improved delivery.
- **Established robust design patterns** and **maintenance best practices**, enhancing scalability and efficiency across multiple complex projects.
- **Led frontend development** and **design system creation** for the **Calculation Rule App**, defining **brand guidelines** and ensuring consistency across platforms.
- **Implemented security fixes** and optimized code quality, reducing vulnerabilities by **30%**, while effectively **managing stakeholder expectations** across **three banking brands**.

[Hcode Technologies](#), *Frontend Developer*

Feb 2021 – Jan 2023

- Leveraged expertise in UI / UX development to deliver **high-quality interfaces** and code across diverse projects.
- Streamlined the **design-to-development process**, fostering enhanced collaboration and productivity organization-wide.
- Helped various NYE, and SF-funded startups to build their MVPs and scale after conquering milestones.
- Helped **Indian Doctors** teach upcoming **NEET graduates** on an app using **video lessons, notes**, etc using **React Native** ensuring **anti-piracy**.
- Worked on **Michelle Obama** initiatives and made prototypes for events around USA and Mexico for "[Women Against Inequality](#)".
- Streamlined development lifecycle, reducing feature ticket **deployment time from 4 weeks to 2 weeks** and implementing CI/CD for deployment.
- Cultivated stakeholder and client relationships, ensuring satisfaction and successful project delivery.

• Projects

↳ [Ohana](#) , *UI developer*

- **Developed webapp** for an **Ed-Tech platform** targeting **primary students**, enabling **online classes** and **extracurricular activities**, which contributed to securing a **\$250K pre-seed funding round**.
- Utilized UI libraries like **Tailwind CSS** for Consistent Design System and analytics tools such as **Google Analytics** and **Mailchimp** to track app traffic, improving **customer retention by 40%**.

↳ [Pollinate Arts](#), *UI developer*

- Helped International Artists around the world to display their art on a platform and their upcoming art events around the NYC(Manhattan) area using Gmaps, **React Native**, and Framer animations.
- Used **Ethereum blockchain** for sales of **NFT-based token Artworks**.
- Implemented **Google Maps** for successful tracking and pinning of events across various cities.

[OnePixel Technologies](#), *UI Developer*

Sept 2020 – Jan 2021

- Managed multiple clients' projects as a UI Designer, delivering high-quality mockups and **prototypes**.
- Contributed to the enhancement of clients' website visibility by creating engaging **social media posts**.
- Implemented strategies to improve **SEO** rankings across multiple regions, optimizing page speed, enhancing domain authority, and ensuring structured page loading.

EDUCATION

Bachelor Of Technology, Computer Science

(2016-20)
